Rochester Environment - Environmental hub for Rochester, NY - Global Biodiversity Outlook 3 official video, Convention on Biological Diversity, UNEP, May 2010 . Research of long term trends in the fossil record suggests that natural speed limits constrain how quickly biodiversity can rebound after waves of extinction. Hence, the rapid extinction rates mean that it could take a long time for nature to recover. Loss of Biodiversity and Extinctions " Global Issues - Survey respondents were asked to identify between three and six pairs of global risks they believe to be most interconnected. Read more about the methodology. Global Risks 2016 - Reports - World Economic Forum -
