elliptic curves modular forms pdf  
- Although the formal definition  
of an elliptic curve is fairly  
technical and requires some  
background in algebraic  
geometry, it is possible to  
describe some features of elliptic  
curves over the real numbers  
using only introductory algebra  
and geometry.. In this context, an  
elliptic curve is a plane curve  
defined by an equation of the  
form  $y^2 = x^3 + ax + b$  where  $a$  and  $b$  are real  
numbers. Fri, 09 Mar 2018
