websphere application server
administration pdf - WebSphere
Application Server (WAS) is a
software product that performs
the role of a web application
server. More specifically, it is a
software framework and
middleware that hosts Java based
web applications. It is the flagship
product within IBM's WebSphere
software suite. It was initially
created by Donald F. Ferguson,
who later became CTO of
Software for Dell. Thu, 30 Jun

What is DMGR in Websphere
Application server? - An
application server is a software
framework that provides both
facilities to create web
applications and a server
environment to run them..
Application Server Frameworks
contain a comprehensive service
layer model. An application
server acts as a set of components
accessible to the software
developer through a standard API
defined for the platform itself.
